

Health Equity in Healthy Built Environment Framework

in Saskatoon and area

Our Vision

A healthy built environment contributing to improved population health and health equity.

Healthy Neighbourhood Design

- * Enhanced physical & social connectivity through public places and efficient, safe networks
- * Creation of mixed land use & zoning that supports health

Neighbourhoods where all* people can easily connect with each other & with a variety of day-to-day activities & services

Healthy Housing

- * Increased access to affordable, quality housing
- * Improved housing conditions for safety & health

Affordable, accessible, quality housing for all* that is free of hazards & enables people to engage in daily activities

Healthy Food Systems

- * Improved community-scale food infrastructure & services
- * Increased access to healthy foods & decreased access to unhealthy foods

A built environment that supports access to affordable, healthy food for all*

Healthy Transportation Networks

- * Attractive, safe & convenient active transportation networks
- * Increased use of public transit

Safe, accessible, multi-modal transportation systems for all* that prioritize public transit & active transportation
